

A Secure Exit

# KEEP WANDERING PATIENTS SAFE & SECURE

The **EV2** Door Kit is a cost-effective wandering resident & patient protection solution for ambulatory individuals suffering from Alzheimer's Disease and dementia or other high risk residents or patients in senior care and healthcare facilities. It is a pre-configured door monitoring and protection starter kit designed to meet your facility's needs.

# The **EV2** Door Kit is ideal for senior care, assisted living, or continuing care facilities that need a quick, cost-effective resident or patient wandering solution.

The **EV2** Door Kit reduces the need to continuously supervise chronic wanderers or to excessively restrict their mobile independence. It permits regular movement of care givers, guests, other residents or family members through a protected doorway while preventing unsupervised wanderers from exiting through the door.

Each wanderer is given an **EV2** wrist tag which allows the individual free and unregulated movement within the interior of the building or residence. Should the wanderer approach the protected door through which he or she is not allowed to pass through unescorted, the **EV2** Door kit alert intervention functionality will auto trigger.

Alternatively, the **EV2** Door Kit may be used as a solution to automate the unlocking of doors if hands free access is needed by residents restricted to wheelchairs. Contact a sales representative to discuss Visonic Technologies' hands-free access control solution.

## THE BENEFITS:

- All in One Kit: Includes all products needed to install a single door wandering resident & patient solution.
- Simple to Install: Installation can be performed by any experienced electrician or security/alarm technician.
- Intelligent Alarm: Only sounds when a wanderer has gone through the protected door without an authorized staff member escort.
- Resident or Patient Escort Option: Wanderers can be escorted through the - protected door by staff members without triggering the **EV2** Door Kit's alert intervention functionality
- Adaptative to Resident/Patient Population Size: New tags can be added to - the basic **EV2** Door Kit installation without risk to patient safety.
- Scalable Solutions: From single-door, stand-alone safety solutions to networked, enterprise wide unified risk mitigation and asset tracking solutions.
- Internationally Safety Compliant: CE, FCC, and IC compliant

## THE STARTER KIT INCLUDES:

- Local Controller
- LF Exciter
- Magnetic Contacts
- Override Keypad
- Patient Wrist Tag
- Power Supply

## YOU CAN ALSO TAG YOUR FACILITY ASSETS.

The **EV2** Door Kit not only protects individuals but also allows you to tag and protect valuable assets, minimizing the risk of theft or unauthorized removal. By leveraging your investment you can better protect these assets and reduce shrinkage and labor costs.

## MONITORED ITEMS COULD INCLUDE:

- Computer Equipment
- Expensive Plant Equipment
- Personal Belongings
- Patient Care Devices
